

Call Recorder

Suppose you could merge freedom with security

Record your calls directly from your Emotion W880 or Jabra Pro Headset

Vidicode's Oygo Call Recording solution uses the Emotion W880 or the Jabra Pro™ headsets to record from desk phones or mobile phones with Bluetooth.

Oygo automatically stores all recordings on your PC. The software displays the recording archive as a list. The recording properties like date and time of the recording are stored with the actual recording and can be viewed in the archive.

Recordings can be played back, e-mailed, exported or copied to other archives. Advanced searches can be made to find a specific (group of) recording(s) quickly or to get a clear picture of the amount of recordings. Archives can be combined in one database for supervisors or group managers.

For security reasons recordings can be stored encrypted. It is also possible to protect recordings from unauthorized playback or deletion with a password.

This Call Recording solution can be used in any kind of organization or small business, using Emotion W880 or Jabra PRO™ headsets.

Article number:

- 070. 01420 Oygo 1 User license
- 070. 01422 Oygo 10 user license

Specifications

- Oygo Call Recording software can be installed on the following operating systems:
Windows XP / Windows Vista / Windows 7
- Works with Emotion W880 and Jabra PRO™ headsets
- Stores 180 hours of conversation per GB free disk space on the PC
- Currently supports 10 languages

Safety and Security:

- Encryption of recordings
- Password protection against unauthorized playback and deleting of recordings.

Call centre use:

This call recorder can be used in small businesses where one telephone line is connected, but it is also possible to use Oygo with every headset in a Call centre.

For the use of Oygo in a Call centre an API can be installed through which Oygo and the Call Centre's software can work together.

A Supervisor may have access to a set of Oygo Archives. These Archives should be on a network drive.
